Sector Exposure by Source of Revenue[#]

Geographical Exposure by Source of Revenue[#]

[^] Risk measures are calculated after fees. An adverse market is defined as a negative quarter, rolled monthly, for the MSCI World Net Total Return Index (Hedged to AUD). Down market capture shows if a fund has outperformed a benchmark during periods of market weakness, and if so, by how much.

[#] Sectors are internally defined. Geographical exposure is calculated on a look through basis based on underlying revenue exposure of individual companies held within the portfolio. Cash exposure includes profit/loss on currency hedging. Exposures may not sum to 100% due to rounding.

^{*} Calculations are based on the monthly ASX released net asset value with distributions reinvested, after ongoing fees and expenses but excluding individual tax, member fees and entry fees (if applicable). Fund Inception 4 August 2015. Returns denoted in AUD.

^{**} MSCI World Net Total Return Index (hedged to AUD)
