INVESTMENT PHILOSOPHY	OBJECTIVES	PORTFOLIO CONSTRUCTION	INVESTMENT RISKS
To invest in outstanding companies at attractive prices, while exercising a deep understanding of the macroeconomic environment to manage investment risk.	To achieve attractive risk-adjusted returns over the medium to long term; while reducing the risk of permanent capital loss. Aims to deliver 9% p.a. net of fees over the economic cycle.	A relatively concentrated portfolio of 20-40 high quality securities constructed with strict risk discipline and macroeconomic insight seeking to achieve strong risk-adjusted, not benchmark-relative returns. Typical cash and cash equivalents exposure between 0 - 20%.	All investments carry risk. While it is not possible to identify every risk relevant to an investment in a fund, we have provided details of risks in the relevant Product Disclosure Statement. You can view the PDS for the relevant fund on Magellan's website www.magellangroup.com.au
