Sector Exposure by Source of Revenue[#]

Geographical Exposure by Source of Revenue[#]

[^] Risk measures are calculated after fees. An adverse market is defined as a negative quarter, rolled monthly, for the MSCI World Net Total Return Index (USD). Down market capture shows if a fund has outperformed a benchmark during periods of market weakness, and if so, by how much.

[#] Sectors are internally defined. Geographical exposure is calculated on a look through basis based on underlying revenue exposure of individual companies held within the portfolio. Exposures may not sum to 100% due to rounding.

^{*} Calculations are based on exit price with distributions reinvested, after ongoing fees and expenses but excluding individual tax, member fees and entry fees (if applicable). Fund Inception 1 July 2007. Returns denoted in AUD

^{**} MSCI World Net Total Return Index (AUD)
